

Volunteer Task Brief

Design a Marketing Survey to Grow TreeAction's Supporter Base

Objective:

Design a short, engaging marketing survey to be shared across all TreeAction social media channels to reach new potential supporters, learn about their environmental concerns, and capture their email contact details.

Key Responsibilities:

1. Develop the Survey

- Create a 5–7 question survey (which can be distributed using Survey Monkey).
- Please generate ideas for questions that will increase engage our audience and increase our supporter base.
- Include questions such as:
 - What environmental issues concern you / your business / your customers the most, right now?
 - What do you think are the most important tangible actions people can take to help the environment?
 - What activities would you like to do to make a difference (e.g. tree planting, education, environmental clear ups, advocacy, fundraising)?
 - Would you like to hear more about volunteering opportunities with TreeAction? (Yes/No)
 - Optional: enter your email to receive updates and invites to future events

- Keep the tone friendly, accessible, and action-focused

2. Prepare Social Media Content

- Write engaging posts for each platform (Facebook, Instagram, LinkedIn) inviting people to take the survey
- Include a clear call-to-action and survey link
- Suggest using impactful visuals (e.g. photos of planting days, infographics)

3. Distribute the Survey

- Our marketing team will then post the survey on all TreeAction social media channels; and share in relevant community groups and environmental forums where appropriate
- Encourage team members and existing volunteers to share widely

After the survey is launched....

4. Collate and Organise Email Data

- Export all email addresses collected via SurveyMonkey
- Create a clean CSV file with columns: Name, Email, Consent to Contact, Interests (if captured)
- Email the responses to the Volunteer Coordinator
- Ensure compliance with data protection (GDPR) – only use emails for TreeAction communications with consent

5. Report Summary

- Provide a short summary including:
 - Total survey responses
 - Total emails captured
 - Top 3 environmental concerns mentioned
 - Top 3 activities people want to get involved in

- Share key insights with the volunteer coordinator

Thank you for your support!
