

Volunteer Task Brief

Task: Research Child Safeguarding Training Options

We are looking for a volunteer to research **free or low-cost remote child safeguarding training** for all session leaders who supervise minors. The aim is to identify suitable online training options that are practical, affordable, and appropriate for people working with children and young people.

What to research

- Free or low-cost online safeguarding training providers.
- Courses suitable for adults supervising minors in a community or voluntary setting.
- Whether the training is self-paced, live online, or webinar-based.
- Any certificate, accreditation, or completion record provided.
- Cost per person, group discounts, or organisational pricing.
- Any key requirements, such as account creation, time commitment, or renewal period.

What to include in your findings

Please gather:

- Course name.
- Provider name.
- Cost.
- Format and duration.
- Who the training is suitable for.
- Link to the course page.
- Any pros or limitations.

Outcome

Please summarise the best options in a short comparison so we can decide which training to use for our session leaders.

A good starting point would be to focus on providers offering remote safeguarding training for volunteers and youth-facing roles.

Thank you for your support!
